

Grosch Drilling Co.

Test Pump report for DMWW Army Post ASR well

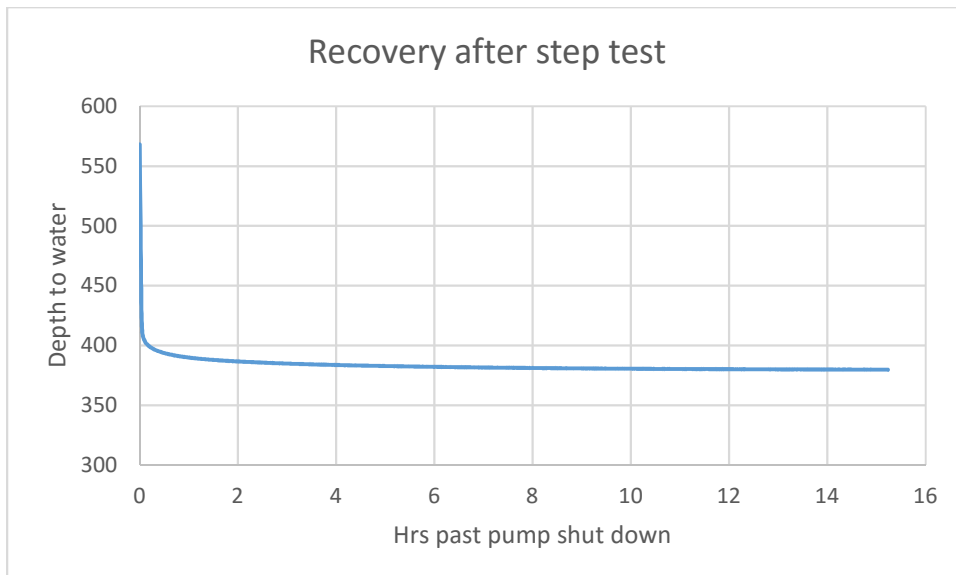

Date: 9-22-16

The following summary was created using data collected manually by test pump crew and transducer recordings.

Test Pump Summary

Step Test

Water Levels measured manually and from the transducer were taken from the top of casing (31" above existing ground level). Initial Static water level was 378.6 feet. The step test started at 11:45 A.M. September 13, 2016. 1750 GPM was established and the well stabilized at 464 feet. At 1:50 P.M. flow was increased to 2200 GPM and pumping level stabilized at 509 feet. At 3:45 P.M. flow was increased to 2600 GPM and pumping level stabilized at 540 feet. At 5:50 P.M. flow was increased for the last time to 2800 GPM and pumping level stabilized at 568 feet. The pump was turned off at 7:46 P.M. and the well was allowed to recover. The Static water level returned to within 5 feet of initial recording in 3 ½ hrs.

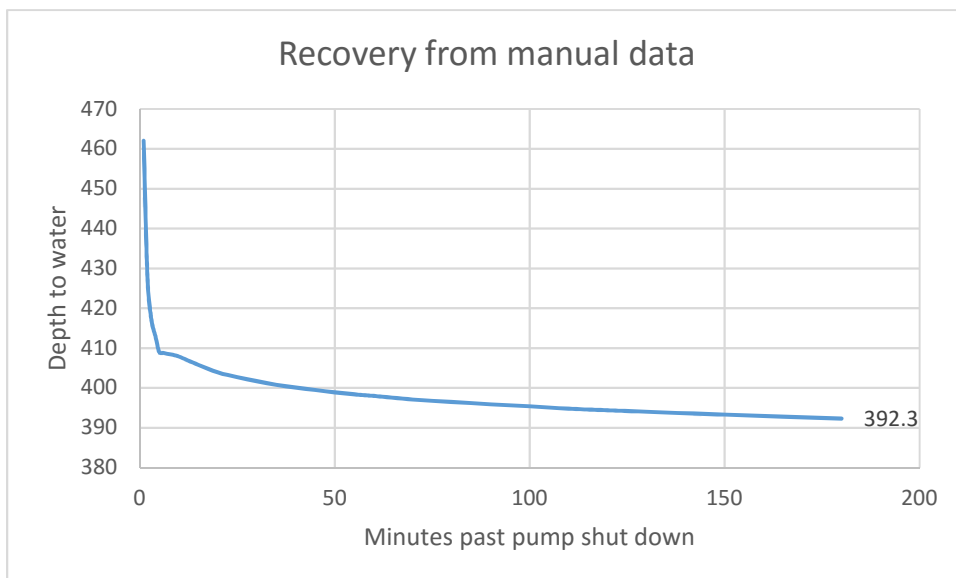

72 hr. Constant Rate Test

Static Water Level was checked at 11:00 A.M. Sept 14, 2016 and recorded at 379.4 feet. Pump was then started and a flow of 2800 GPM was established. The following table gives an outline of the data in 6 hr. intervals. The Specific Capacity at 2800 GPM for this well came to 14.07 using 199 feet of drawdown.

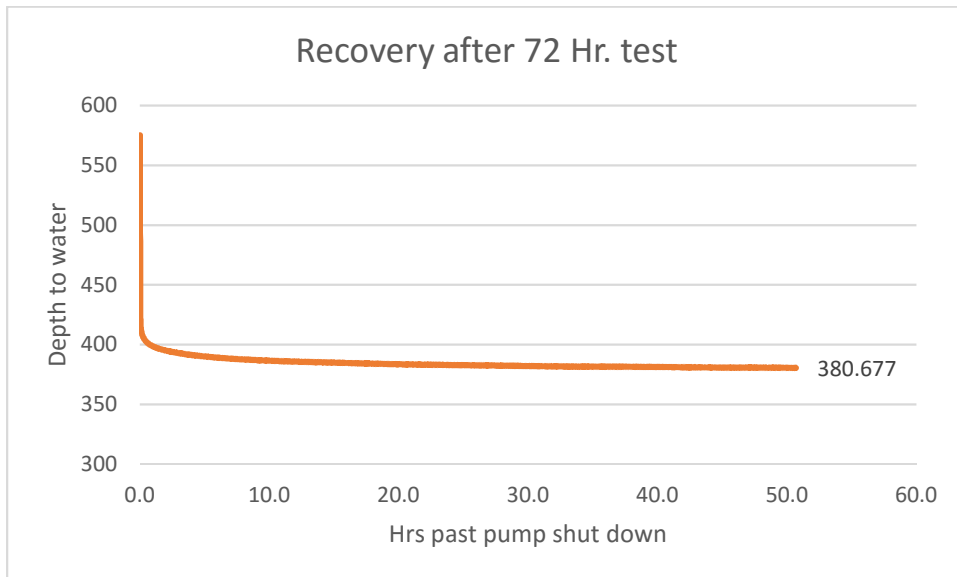

72 Hr Test			
Sept.	Time	Manual	Transducer
14	12 P.M.	562	559.4
	6 P.M.	569	569.1
15	12 A.M.	570	571.2
	6 A.M.	571	572.4
	12 P.M.	575	573.6
	6 P.M.	577	573.7
16	12 A.M.	577	574.4
	6 A.M.	578	574.4
	12 P.M.	578	574.5
	6 P.M.	578	574.6
17	12 A.M.	578	574.8
	6 A.M.	578	574.9
	11 A.M.	578	575.1

The pump was shut down at 11:00 A.M. and the well was allowed to recover.

This graph shows the manual readings for recovery.

This chart was created using the transducer data. The end reading from this data set was 380.6 feet to water recorded at 1:38 P.M. Sept 19, 2016.

Subject: ASR Test

Vern,

Following are the readings from the step test. It looks like 500' to 507' pumping level would be a good number for your the pump design.

Static water level 378.6-feet

GPM	Pumping level	Draw Down	Specific Capacity
1750	467'	88.4'	19.79
2200	507'	128.4'	17.13
2600	539'	160.4'	16.21
2800	568'	189.4'	14.78

I would recommend running the test at 2800 GPM to leave room for additional draw down during the 72 hr test.

Please let me know ASAP as we would like to start the 72Hr. test today.

Thanks,

Gale
